

ADM-8

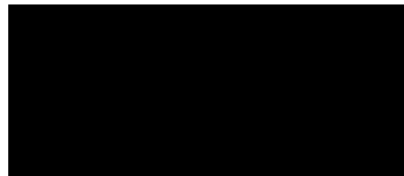

18 October 1962

MEMORANDUM FOR: ADD/R
DD/R

SUBJECT: CIA Supergrade Increases

1. The attached is my version of the meeting with Mr. Amory on the matter of the new supergrade positions. It was agreed after the meeting that the Agency would respond with a letter to Mr. Bell agreeing to reduce by some 50% or more the number of reserve supergrade positions consistent with Amory's strongest point.

2. Emmett Echols was supposed to draft such a letter and coordinate with the various DDs; however, I have seen nor heard nothing more. I did draft a proposed letter which is also attached as a possible device for getting started. I gave copies of both these papers to Emmett. He expressed much appreciation for these contributions, and presumably we will receive something somewhere along the line. In the meantime, I thought this might be useful for your information.
